Article 1935 - Coarse-Knit Gloves BAUMWOLLE/POLYESTER - PPE category I: minimal risks - size(s): S/7-XXL/11

Manufacturer's information

according to Regulation (EU) 2016/425, Annex II, Section 1.4. (published in the Official Journal of the European Union)

Please read carefully before using! You are required to enclose this information leaflet when passing on the personal protective equipment (PPE), or to present it personally to the recipient. You may therefore reproduce this leaflet at your own discretion.

Declaration of Conformity

CE These gloves are classified as personal protective equipment (PPE). The CE mark confirms that the product satisfies the applicable requirements of Regulation (EU) 2016/425.

A. Markings on the gloves:

Trademark, model no., size, CE icon, at foodstuff suitability: glass and fork symbol, pictograms, i-mark, factory icon with date of manufacture: month/year

teXXor	Brand label of manufacturer		i mark: Reference to the manufacturer's information.
1935	Article no. of the manufacturer		Date of manufacture month/year: 00/0000Monat/Jahr: 00/0000
10	Size (example)	CE	The CE marking confirms compliance with the requirements of European Regulation 2016/425.

B. Explanation and numbers of the European standards whose requirements the gloves satisfy:

standards retrieved from: the Official Journal of the European Union. Available from DIN Media GmbH, D-10787 Berlin. www.dinmedia.de

EN ISO 21420:2020 - Protective gloves - General requirements and test methods

C. Purpose, applications and risk assessment:

Applicable for light packing and sorting work with minimal risks, e.g. in the craft trade, trade fair construction, packaging industry, logistics

Please note that the actual conditions of use cannot be simulated and that the decision on the glove's suitability for its intended purpose therefore lies exclusively with the user. The manufacturer is not responsible for improper use. Hence, an assessment of the residual risk should be performed before use in order to determine whether this glove is suitable for its intended purpose.

Precautionary measures during use:

These gloves belong to category 1 and are only suitable for use when exposed to minimal risks.

This category only includes gloves that protect their user against:

- Mechanical activities with exclusively superficial implications (e.g. gardening gloves).
- Detergents with a weak or decreasing impact (e.g. gloves worn when using diluted detergent solutions).
- Dangers when handling hot substances that do not expose the user to temperatures above 50° Celsius, or hazardous substances.
- Atmospheric influences that are neither unusual nor extreme (seasonal clothing).
- Slight impact or vibration that does not affect the vital organs and whose implications will not cause irreparable damage.

These gloves must not be used for activities associated with more excessive stress or risks (e.g. caused by chemicals, thermal conditions or similar influences).

D. Cleaning, care and disinfecting:

Washing Instructions:

Do not wash and bleach the gloves. Drying in tumbler is not possible. Do not iron. Professional dry and wet cleaning is not allowed.

Both new and used gloves must be checked carefully for any damage before they are worn. Never store dirty gloves if they are intended for reuse. Users are advised to carefully remove the gloves on the right and then the left if it is not possible to remove the soiling or if doing so would present a danger. Here, use the hand wearing the glove in such a way that the other glove can be removed without coming into contact with the soiling.

E. Storage and aging:

Store in a cool, dry place, away from direct sunlight and sources of ignition, preferably in the original packaging. Do not store in a folded state or under heavy loads. The gloves are subject to material-related ageing due to wear and tear, intensity of use, environmental influences such as light, moisture and temperature, and care, which is why their service life cannot be specified exactly. The protective effect may diminish even without visible damage. The date of manufacture and issue must be taken into account, as must regular visual inspections. Only use the gloves for their intended purpose. Before each use, the gloves must be checked for damage or material changes (e.g. holes, colour changes, a brittle and/or cracked coating). Damaged gloves must be disposed of and must not be used under any circumstances. The employer must ensure that they are replaced in good time.

F. Disposal:

Used gloves may be contaminated with environmentally harmful or hazardous substances. Dispose of the gloves in accordance with applicable local laws.

G. Material composition:

polyester/ cotton
with nubs of polyvinyl chloride (PVC) (both sides)

H. Packaging:

This item will be delivered in a uniform cardboard box with a content of: 240 pair
The smallest sales unit is: 12 pair

I. Health risks:

Allergies, caused by the proper use of the gloves, are not yet known. If an allergic reaction still occurs, consult a doctor or dermatologist.
